<b>Distribution per unit (DPU)</b>	<b>10.99 cents</b>	<b>10.70 cents</b>	<b>2.8</b>

- (A) Gross revenue and NPI have increased mainly due to contribution from five nursing homes acquired in September 2022, and higher rent from the Singapore properties<sup>3</sup> under the new master lease agreements which commenced in August 2022. The higher rent was partially offset by the depreciation of the Japanese Yen.
- (B) Higher trust expenses due to higher management fees in line with the higher NPI and enlarged portfolio.
- (C) Finance costs have increased mainly due to funding of Capex and new acquisitions in 2022 and higher interest costs from Singapore dollar debts partially offset by depreciation of JPY. Notwithstanding, interest cost on loans drawn down to fund Capex has no distribution impact as they are not subject to deduction when computing distributable income<sup>4</sup> to Unitholders.
- (D) Movement in net change in fair value of investment properties arose from the straight-line rental adjustments under the step-up lease arrangement for the Singapore properties<sup>3</sup> which commenced in August 2022. There is no distribution impact.

1. Include management fees

2. Net off interest income

3. Effect of recognising rental income on a straight-line basis over the lease term of the investment properties i.e. effective rent. There is no distribution impact arising from effective rent treatment

4. Distribution adjustment is net of amount retained for capital expenditure (\$3m p.a.). Distribution adjustments are largely on net change in fair value of financial derivatives & investment properties, financing costs incurred for capex, effects of recognising rental income on a straight-line basis and temporary differences (subject to further tax review during the period of distribution)

- (A) The decrease in investment properties was largely driven by the depreciation of Japanese Yen for the period offset by Capex work done for YTD 3Q 2023.
- (B) The decrease in loans and borrowings was largely due to the depreciation of Japanese Yen and repayment of fixed rate note, partially offset by additional drawdown of short term loans for Capex and working capital purposes.

## 5 Key Principles

### Acquisition financing has to be long-term: at least 3 years or more

- Mitigates refinancing risk post acquisition

### Diversify funding sources

- May explore other non-traditional funding sources (e.g. perpetual bonds, convertible bonds, equity etc.)

- May consider asset-level financing if tax and pricing considerations are optimal

### Adopt natural hedge financing strategy to achieve stable net asset value

- Match asset currency with financing currency to mitigate principal forex risks arising from overseas acquisitions
- Aim to achieve at least 50% natural hedge on the portfolio basis; remaining 50% depending on the interest rate differential and nature of the currency involved

### Prudent financial risk management strategy for distribution stability

- Mitigates risks from adverse interest rate and forex fluctuations
- Hedge at least 50% of interest rate and forex exposures on the net income from foreign investments.
